Does your infrastructure  
look something like this?

 @PrettyAgile

#notrainwrecks  
Image: <https://flic.kr/p/rupU15>

 @AgileCanuck

# What Should We Do About It? The Debate Begins...

## Technology

We have to get off this platform because ....

It's getting more and more unstable

The platform is out of support

We can't find anyone who knows how to code in assembly (or COBOL or...)

## The "Business"

Nothing

Why do I care?

This is just an excuse for the Technology people to get the 'new shiny thing'

**SHOW  
ME THE  
MONEY!**

# Show Me the Destination

*Destination postcards do double duty: They show the Rider where you're headed, and they show the Elephant why the journey is worthwhile.*

- Switch, Chip Heath & Dan Heath

[#notrainwrecks](#)  
Image: <https://flic.kr/p/MKsVwK>

 [@AgileCanuck](#)

# How Do We Do This?

Copy and Paste

Waterfall

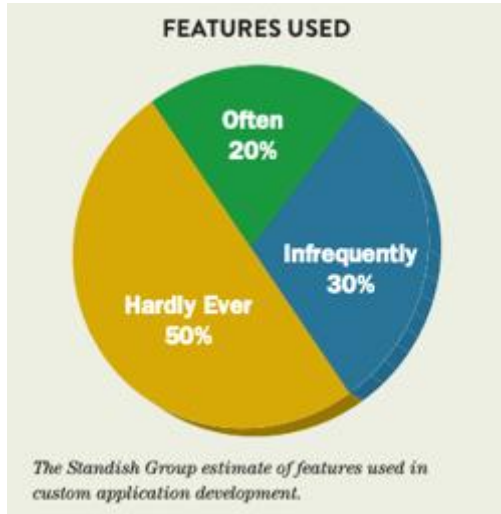

Carve out a special team(s) of  
our best and brightest

# Really? Why not?

## Copy and Paste

You wont need everything

 @PrettyAgile

## Waterfall

SAFe will give you  
a better result

#notrainwrecks

## Carve out a special team(s) of our best and brightest

If you branch you will have to  
merge – people and systems

 @AgileCanuck

A close-up, front-facing shot of Morpheus from the movie The Matrix. He is wearing his signature black sunglasses and has a serious, intense expression. The background is a blurred, outdoor setting.

**WHAT IF I TOLD YOU**

**THERE IS A BETTER WAY?**

# Start With An Epic Writing Workshop

*“Yes, you do need to do this!”*

*“Yes, you do need to include “the business”!”*

## Why Hold a Workshop for an Enabler?

- Creates shared understanding
- Foster alignment on the outcomes
- Provides transparency into the solutions complexity
- Enables more informed prioritisation

# Be Clear on the Business Outcomes & Don't Forget the Leading Indicators

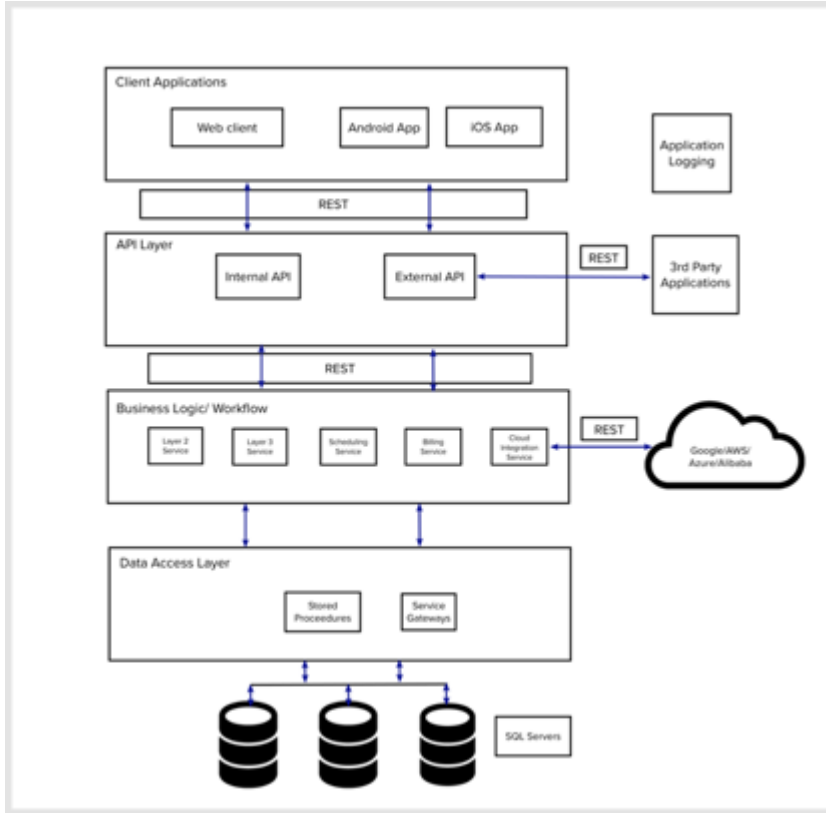

Epic Hypothesis Statement	
<b>Funnel Entry Date:</b>	<The date that the epic entered the funnel.>
<b>Epic Name:</b>	<A short name for the epic.>
<b>Epic Owner:</b>	<The name of the epic owner.>
<b>Epic Description:</b>	<An elevator pitch (value statement) that describes the epic in a clear and concise way.>  <b>For</b> <customers> <b>who</b> <do something> <b>the</b> <solution> <b>is a</b> <something - the 'how'> <b>that</b> <provides this value> <b>unlike</b> <competitor, current solution or non-existing solution> <b>our solution</b> <does something better - the 'why'>
<b>Business Outcomes:</b>	<The measurable benefits that the business can anticipate if the epic hypothesis is proven to be correct.>
<b>Leading Indicators:</b>	<The early measures that will help predict the business outcome hypothesis. For more on this topic, see the Innovation Accounting advanced topic article.>
<b>Nonfunctional Requirements (NFRs):</b>	<Nonfunctional requirements (NFRs) associated with the epic.>

© Scaled Agile, Inc.

The **Business Outcome** should be decommissioning focused not migration focused

A good **Leading Indicator** might be:  
Number of users/business interactions goes down on current platform

# Solution On A Page (Or Whiteboard)

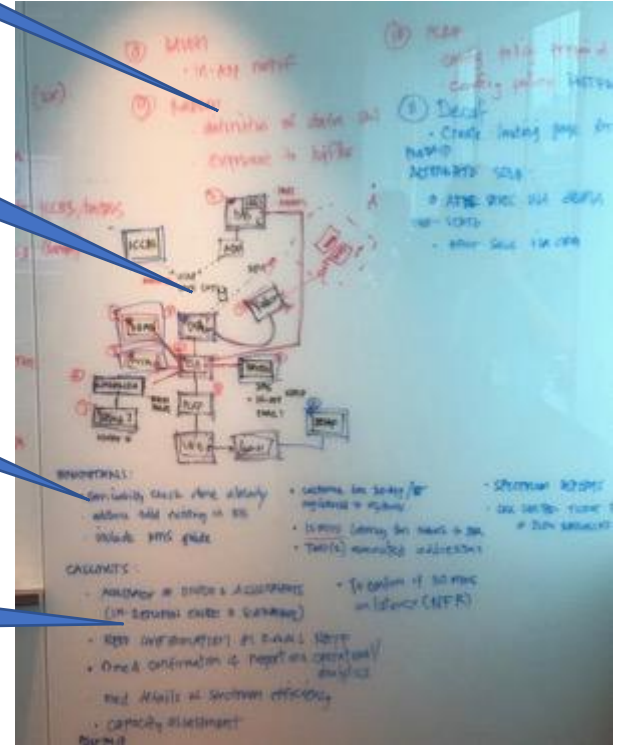

CRUD

Simple boxes

Assumptions

Questions

+

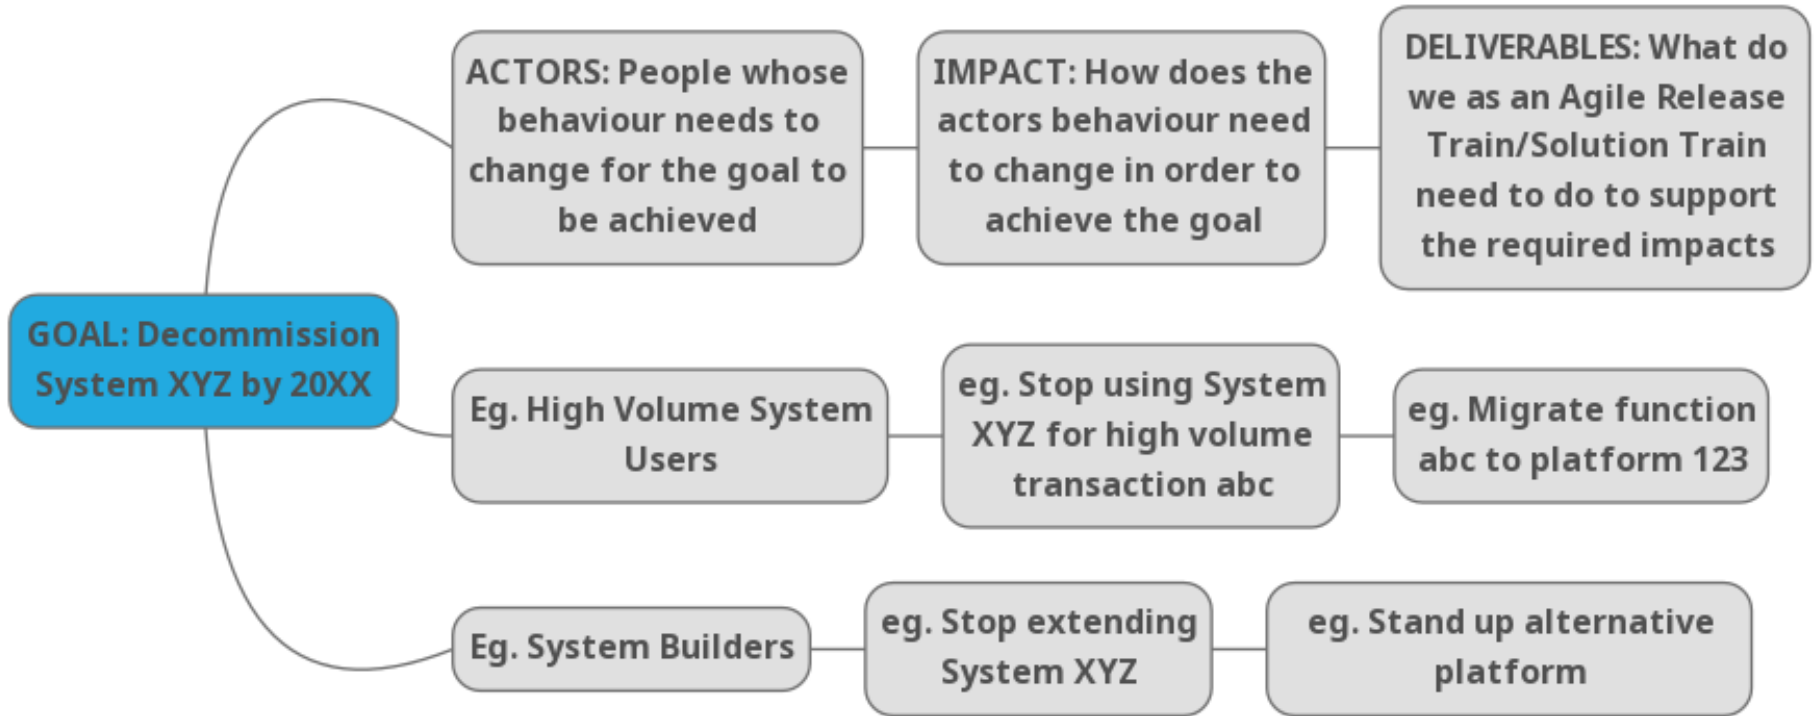

*CHARGE!*

# Break It Down....

# Try Gojko Adzic's Impact Mapping

# Define the Minimal Viable Product

*We don't need to do this. We know it works!*

*The goal of the MVP is to **begin the process of learning**, not end it. Unlike a prototype or concept test, an MVP is designed not just to answer product design or technical questions. Its goal is to **test fundamental business hypotheses**.*

— Eric Ries, *The Lean Start Up*

## But How Does An MVP Apply To An Enabler Epic?

Image: <https://flic.kr/p/iLhSaS>

Simplest thing you can possibly build that tests the hypothesis that your technology solution will support the business outcomes

The learning won't be thrown away, but you'll need to acknowledge that the asset, whole or in part, might be.

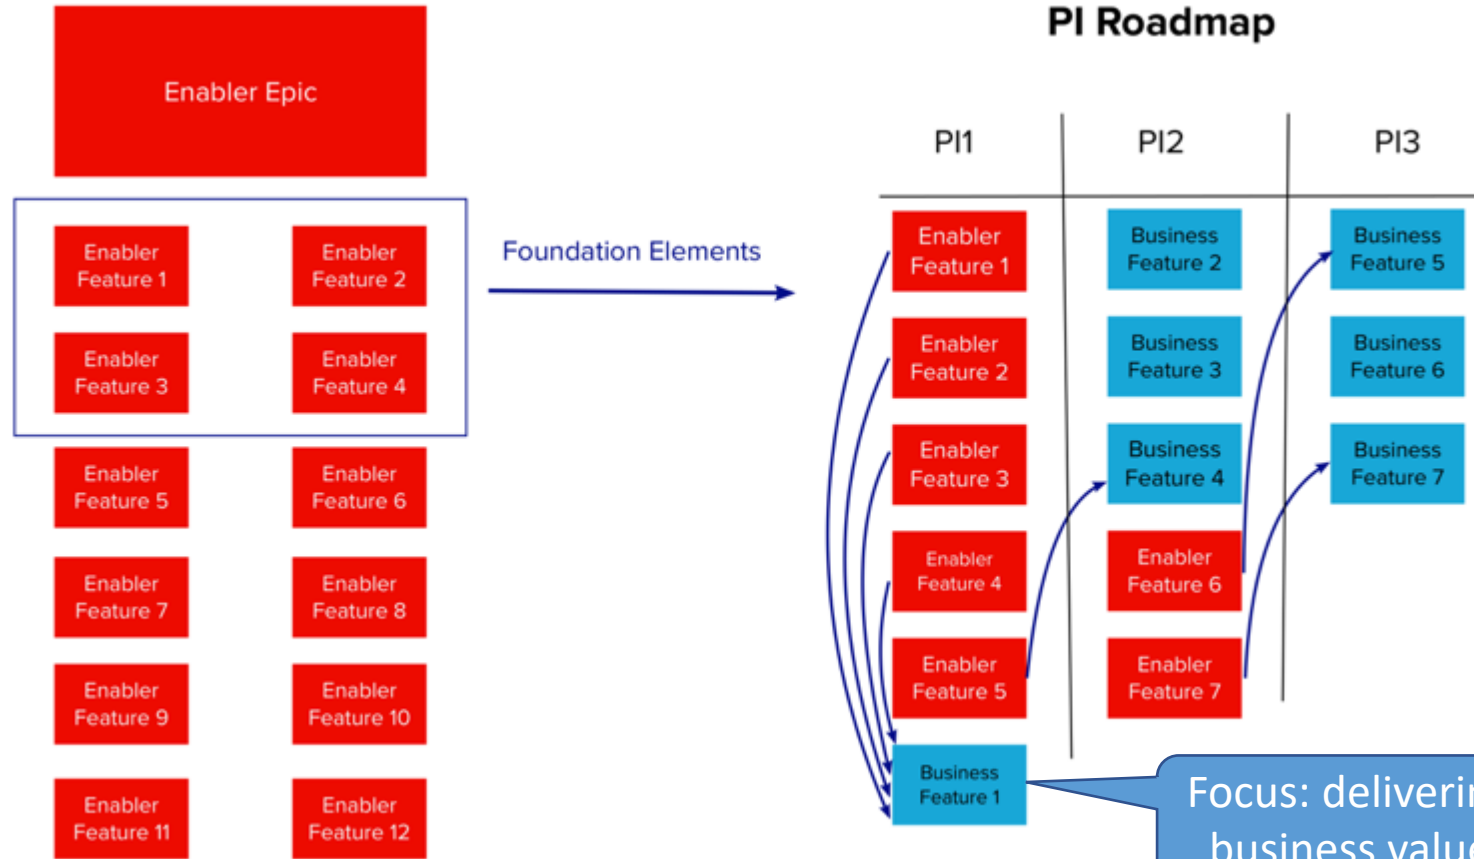

# Deliver Business Value While Migrating; A Win: Win Approach

*“...the only technical debt work that should be prioritized is work that increases future flows through the value stream. Tech debt should never be done for the sake of software architecture alone...”*

— Mik Kersten  
Project to Product

# Business Roadmap Driven Epic Migrations

# Steel thread

# So You Think You Know How Your Current System Works?

## Test Driven Development

Step 1 Write tests for the behavior of the system

Step 2 Run them on the legacy system and see how many pass!

Legacy System

Step 3 Determine which is correct – the test or the system

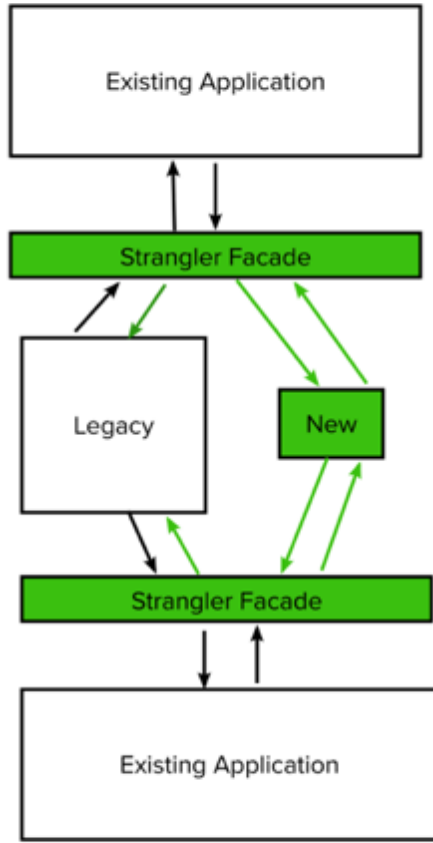

Step 4 Run and add tests for New System as you build

New System

# Strangler Pattern

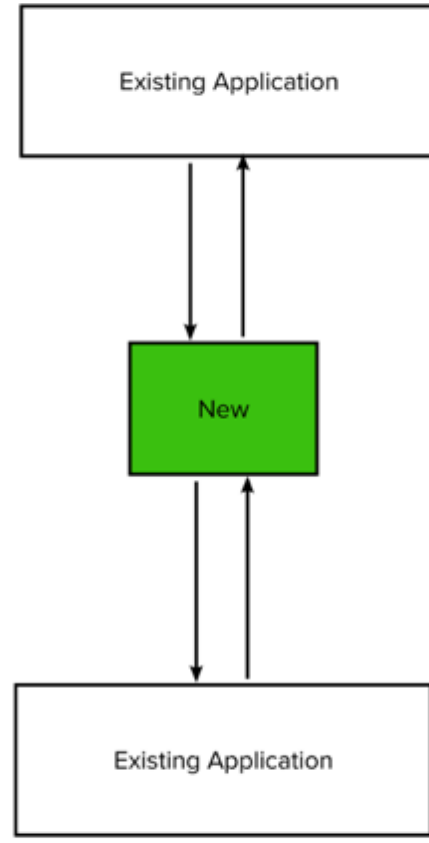

Beginning of migration

Progressing

#notrainwrecks

Migration Complete

# Going Forward

Image: <https://flic.kr/p/9LdVCR>

# Leverage The Guardrails To Strike That Balance

Guiding Investments by Horizon

Apply Capacity Allocation

Approving Significant Initiatives

Continuous Business Owner Engagement
